THE HISTORY OF GÜROK GROUP

REDEFINING HOSPITALITY TOGETHER

Since beginning its journey in Kütahya in 1948, Gürok Group has set new standards for leadership in business and the pursuit of a better future. From its early days rooted in craftsmanship and vision, the group has grown into a global force, weaving innovation, sustainability, and human potential into everything it does. Today, with over 5000 employees, 12 diverse brands, and a presence in more than 140 countries, Gürok continues to push boundaries across industry, tourism, construction, and FMCG. At its core lies a philosophy of thinking boldly, acting with purpose, and creating positive impact; values that fuel its journey from heritage to horizon. By blending cultural depth with a future-oriented mindset, Gürok not only delivers products and services of exceptional quality but also contributes meaningfully to society and the planet.

LAV HORECA is a natural extension of this legacy, where expertise in glassmaking meets the evolving needs of the hospitality world. Drawing on more than three decades of experience, we are a trusted partner to professionals in over 140 countries, offering a wide range of glassware that balances functionality, resilience, and elegance. Every piece we create reflects our passion for craftsmanship and our commitment to sustainable, customer-centric design.

Backed by state-of-the-art factories producing two million pieces daily, a strategic Madison

Avenue showroom, and an efficient North American distribution hub in New Jersey, we make sure our partners receive exceptional products as well as seamless service. Whether through stackable, tempered glasses engineered for heavy use or fine-rimmed collections designed to elevate the guest experience, our focus is on helping our clients deliver memorable moments at every table.

What truly distinguishes LAV HORECA is our dedication to building relationships based on trust, reliability, and shared ambition. We see ourselves as more than a supplier; we are collaborators who listen, innovate, and adapt to create tailored solutions. We also provide custom, branded decorative glassware using advanced printing and laser technologies, with our design team tailoring designs to each brand's marketing needs and current consumer trends. Our sustainability-driven approach, and attentive service set us apart in a competitive industry.

As Gürok Group continues to chart its path of progress and innovation, LAV HORECA carries this vision into the heart of the hospitality sector, partnering with establishments worldwide to create meaningful, beautiful, and lasting experiences for their guests.

Follow. Discover. Connect.

Follow LAV HORECA across digital platforms and stay updated on our latest collections, inspiring table setups, and behind-the-scenes innovation.

INNOVATION WITH RESPONSIBILITY

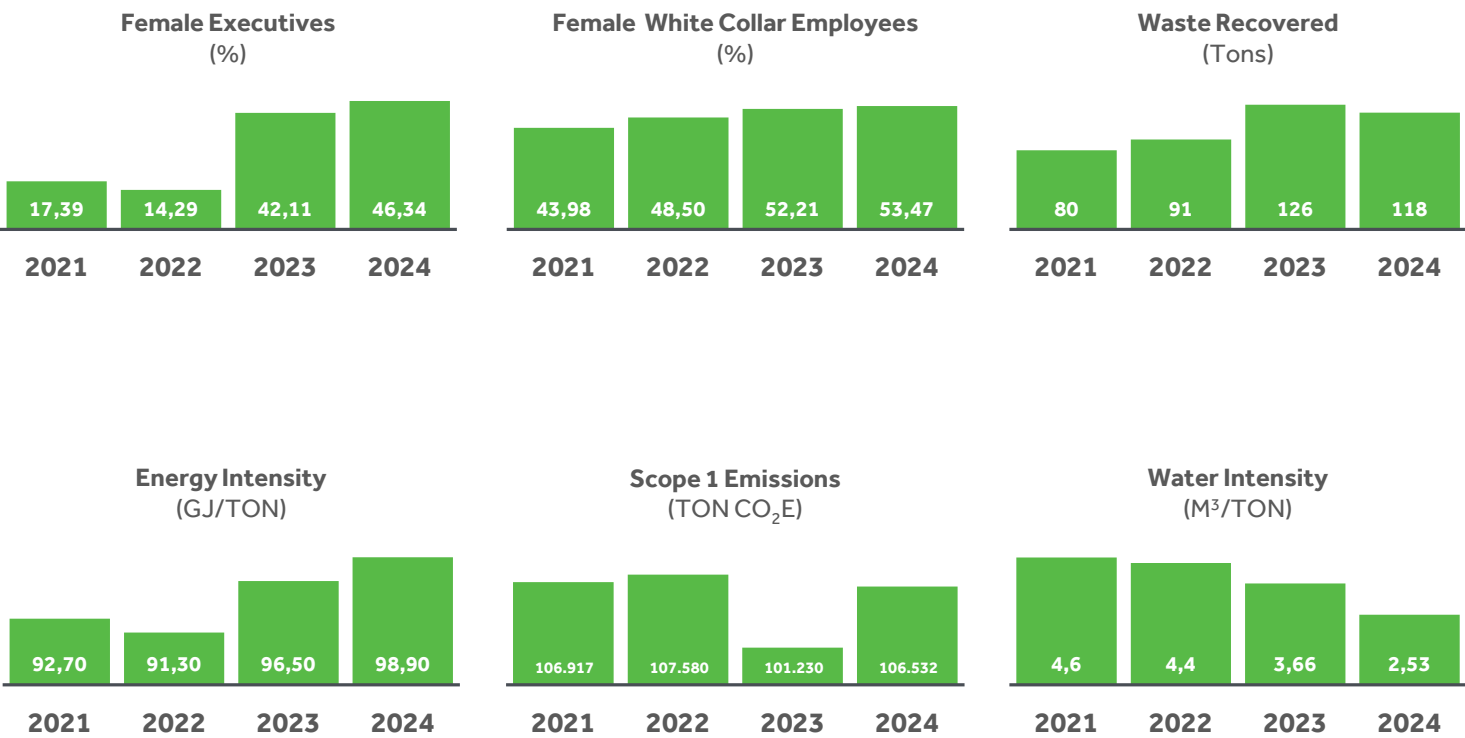

At LAV HORECA, we believe true progress is achieved by innovation paired with care for the planet.

Our 2020–2025 strategy focuses on three core commitments — Better Business, Better Products, Better World — embedding ethics, creativity, and sustainability into everything we do.

In alignment with the UN Sustainable Development Goals, we’ve already reduced greenhouse gas emissions by nearly 6% and cut overall water consumption by over 16%. We also significantly improved water efficiency: while producing one drinking glass required 4.4 glasses’ worth of water in 2022, we reduced this to 1.9 by 2024, while continuing to craft durable, eco-conscious glassware that supports a circular economy.

Looking ahead, we remain dedicated to advancing sustainable practices, fostering meaningful collaborations, and delivering solutions that move the hospitality industry toward a brighter, greener future.

LAV HORECA's Contribution to The UN Sustainable Development Goals

Quality Education:
We invest in the professional and personal development of our employees and prepare them for the future. We partner with universities. We contribute to children's access to education through our community investment in education.

Gender Equality:
LAV HORECA believes the empowerment of women is the lifeline to any community. Our goal is to increase the number of female employees, the percentage of female executives and the skills of women regardless of their age through social responsibility projects.

Clean Water & Sanitation:
Access to clean water is a crucial life-threatening global environmental issue. We as LAV HORECA are therefore developing projects to reduce water consumption in our manufacturing processes and investing in new technologies.

Decent Work & Economic Growth:
At LAV HORECA, we strive to be a safe employer, a reliable partner and a brand that provides quality with each product. We develop purchasing practices and social responsibility projects that contribute to the well-being of communities.

Industry, Innovation & Infrastructure:
We invest in low-impact, high-value products and prioritize collaborations in R&D. We create competitive advantage by manufacturing our own machines. We follow the principles of Industry 4.0 and digitalize our processes.

Responsible Production & Consumption:
LAV HORECA focuses on resource-efficient production without compromising quality or safety. As LAV HORECA we support circular economy principles, thus working towards reducing plastic use and increasing glass recycling.

Why do professionals choose LAV HORECA?

Product Excellence

Unmatched Durability

Engineered for the pace and pressure of daily service.

Brilliant Clarity

Superior transparency showcases every beverage.

Thermal Shock Safe

Handles extreme temperature shifts without compromise.

Dual-Piece Manufacturing

Two-piece structure for balanced form and strength.

Fine Rim Experience

Elegant fine rims elevate taste, feel, and presentation.

Scratch Resistance

Stays pristine after repeated cycles and heavy rotation.

Stackable Efficiency

Stable nesting saves space and speeds workflow.

Microwave & Dishwasher Safe

Tested and approved for professional kitchens and care routines.

Purpose-Driven Design

Every line and curve shaped for functionality and elegance.

Leak-Proof

Secure seals for takeaway, delivery, and on-the-go service.

Crafted for the Pace of Hospitality

Built for high-volume, fast-paced operations.

Sustainability Commitment

BPA-Free & Lead-Free

Safer materials for people and planet.

Sustainability at the Core

Less energy, less water, more sustainable production. Built to last, not to waste.

Operational Excellence

Global Reliability

Your glassware arrives when and where you need.

Automated Quality Control

Advanced systems deliver consistent perfection.

High-Capacity Production

Guaranteed supply continuity.

Customer-Centric Service

Tailored solutions, fast responses, and scalable delivery.

Industry Expertise

Industry Insight Advantage

As hotel operators, we solve real service challenges.

HORECA Focused DNA

A mindset built for hospitality.

Hospitality-Tested, Globally Approved

From boutique resorts to international chains.

The

LOWEST
ENERGY &
WATER
FOOTPRINT

in the Industry.

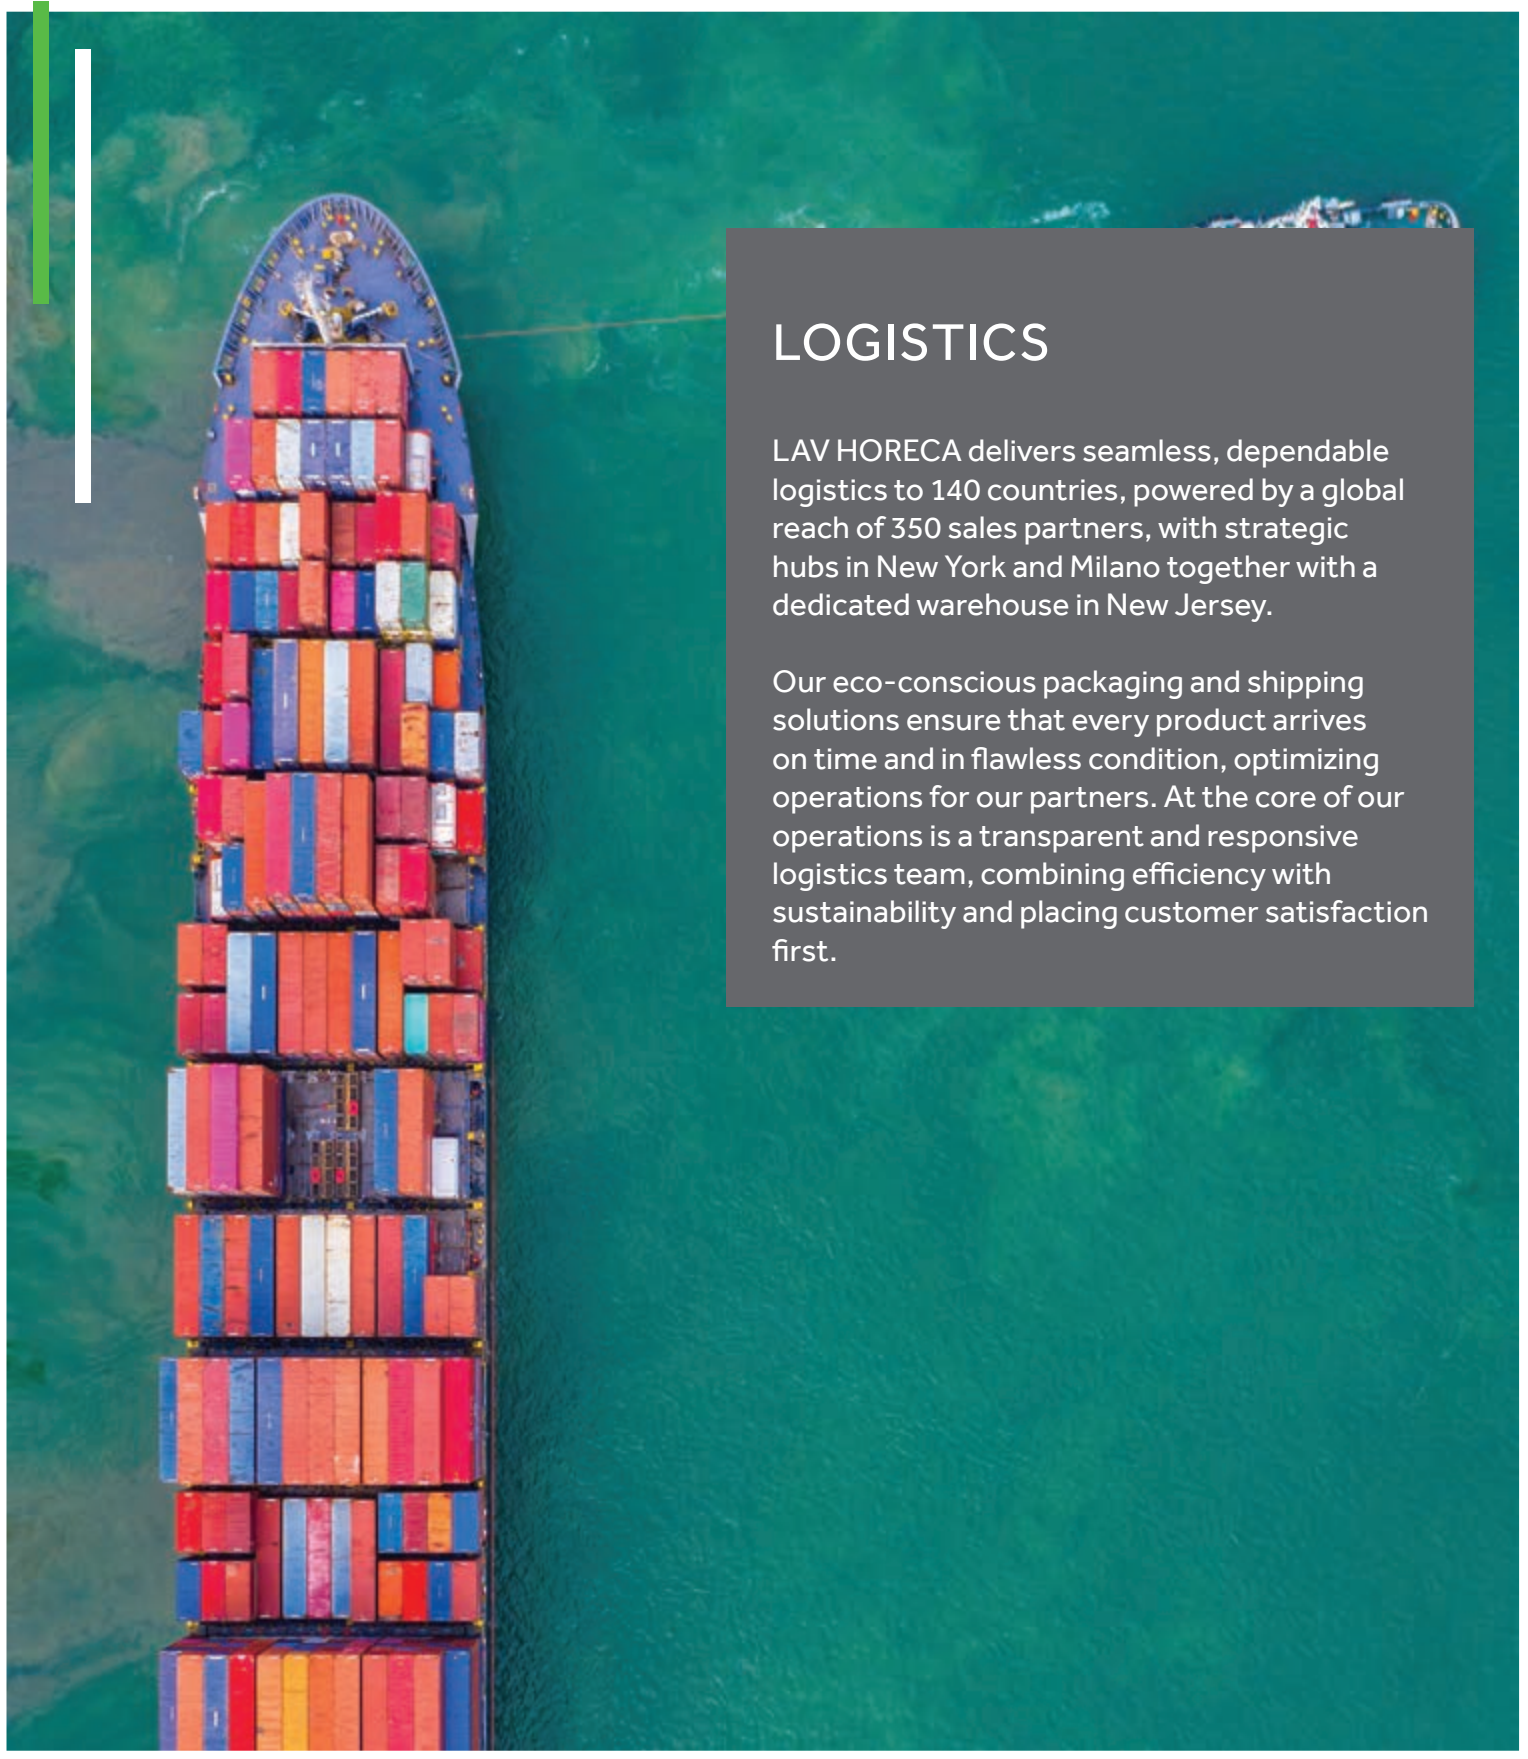

CERTIFICATION

We achieve unwavering quality across all settings with a structured, holistic approach, creating flawless experiences for our catering partners — underpinned by internationally acclaimed certifications in production, marketing, communication, licensing, and sustainability.

Driven by a Total Quality Management philosophy, these certifications uphold excellence at every level of our operations, empowering us to meet the diverse standards and demands of the hospitality sector.

An aerial photograph of a large container ship sailing on a greenish-blue ocean. The ship is viewed from the front, showing its bow and the long deck covered with stacks of colorful shipping containers in shades of red, blue, orange, and white. A grey rectangular text box is positioned on the right side of the image, containing the title 'LOGISTICS' and two paragraphs of text. On the left edge of the image, there is a vertical green bar and a white bar.

LOGISTICS

LAV HORECA delivers seamless, dependable logistics to 140 countries, powered by a global reach of 350 sales partners, with strategic hubs in New York and Milano together with a dedicated warehouse in New Jersey.

Our eco-conscious packaging and shipping solutions ensure that every product arrives on time and in flawless condition, optimizing operations for our partners. At the core of our operations is a transparent and responsive logistics team, combining efficiency with sustainability and placing customer satisfaction first.

At Bijal, we embrace playfulness and creativity in everything we do, and LAV HORECA has been a perfect partner in bringing that vision to life. Their glassware does more than serve drinks; it adds a layer of elegance and surprise to our dining experience. From the moment we engaged with their team, we were impressed by how they listened to our unique needs and delivered customized solutions that align perfectly with our concept.

The fine-rimmed designs and durable quality allow us to maintain the highest aesthetic standards while withstanding the rigorous demands of our busy service. The logistics are seamless, too. Deliveries arrive on time and in impeccable condition, no matter the scale.

LAV HORECA has helped us elevate the experience for our guests in ways that are subtle yet unforgettable, turning every sip into part of the story we want to tell.

Barış Aktaş, General Manager at Bijal Resort

Trusted by Those Who Set the Standard

Our guests come to Ali Bey Hotels expecting an unforgettable experience, and every detail counts. That's why we chose LAV HORECA. Their glassware consistently delivers on elegance, functionality, and durability. The range they offer is remarkable: from beautifully delicate wine glasses to tough, tempered pieces that withstand heavy usage, without compromising style.

What truly sets them apart is their commitment to sustainability, a value we also hold dearly at our resorts. Their use of recycled glass, eco-conscious packaging, and efficient production practices give us confidence that we are making a responsible choice without sacrificing quality.

Beyond the products, their team has been outstanding. They are responsive, reliable, and proactive. For a resort like ours, which operates at a high pace and high standard, LAV HORECA has proven to be a partner we can depend on every day.

Emre Ergün, Beverage Manager at Ali Bey Resort

In flair and in service, precision pays the bills. I teach bartenders to get 1% better every day, and I expect the same discipline from the tools we use and the brands we collaborate with. LAV HORECA's glassware earns its place in my content.

Presentation is currency. The right glass turns a solid build into a moment. In our recent video collaboration, I chose LAV HORECA pieces because they make liquids look luminous and keep the silhouette clean. Colours read true, layers stay distinct, and garnishes sit with precision, exactly what you want when the eye decides value before the first sip. Across the range; rocks, highball, collins, classic cocktail glasses, coupe, the proportions feel considered, so a sequence of serves looks coherent on screen and equally refined on the bar. The consistency across the entire range means I can switch between styles without compromising the look or feel of a drink, and having shot videos with several products from the range, I've experienced this reliability on screen and behind the bar. That same attention to detail plays an important role for brands and venues looking to create a strong impression across menus and presentations.

Ivan Usov, USA Flair Champion of 2022-23

Trusted by the Best

In cocktail service, the glass is the frame. It decides how colour reads, how aroma meets the guest, and whether a serve feels premium. When I evaluate glassware, I want two things: clear brightness that lets the drink glow, and a confident, well-weighted feel in hand. LAV HORECA delivers that combination. Their forms don't compete with the recipe; they elevate it, an elegant stage that makes layers sharper, garnishes neater, and the whole serve look composed.

I appreciate when a glass works with me, not against me. You can feel it right away—good grip, smooth movements, and the cocktail ends up looking great without any extra effort. For bartenders that care about image as much as taste, this matters. The same precision comes through whether you're serving a guest or capturing a video, and after working with these glasses behind the bar and during shoots, I can confidently say their quality deserves a spot on menus that care about elevated presentation. If your aim is chic, video-ready serves that add real value to presentation, LAV HORECA is a smart choice.

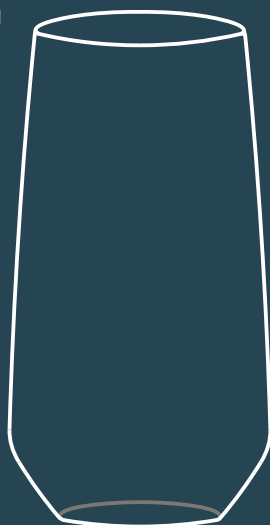

Davide Norcini, Vero Bartender Champion of 2025

FINE RIM

Fine Rim

The fine rim brings sophistication and functionality together, delivering a premium drinking experience without sacrificing strength.

Refined Sip

Its delicate edge elevates the sensory pleasure of each sip, ideal for venues aiming to set a higher standard in fine dining and upscale bars.

Durable

Despite its finesse, the glassware remains robust and dependable, perfectly suited to the demands of professional service. Fine-rim glassware, where elegance meets performance.

STACKABLE

Stackable

Engineered for maximum efficiency, LAV HORECA's stackable glasses save valuable storage space while maintaining a secure, stable fit that prevents tipping and breakage.

Secure Nest

Their smart design doesn't sacrifice what matters most, these glasses deliver the signature style, durability, and functional excellence expected by professionals in the most demanding environments.

Space Saving

Perfect for fast-paced settings where practicality meets sophistication, they help you optimize your space without lowering your standards.

TEMPERED

5× Stronger

Up to five times the strength of ordinary glass, dramatically cutting breakage, replacement costs and operational waste.

Fully Tempered

Professionally heat-treated for industrial use: resists heavy handling and high-volume dishwashing while maintaining shape and clarity.

Thermal Safe

Engineered to withstand rapid temperature changes, safe for hot drinks (tea, coffee, mulled wine) without cracking or stress damage.

LEAK PROOF

Freshness

Preserves flavor and hygiene, minimizes both cross-contamination and food waste, while also reducing reliance on single-use plastics by providing more sustainable takeaway solutions.

Airtight

Precision seals lock in aroma and texture from prep to delivery, preventing air ingress and extending product integrity during storage and transport.

Leak-Proof

Engineered lids and robust glass bodies eliminate spills and product loss in high-volume service, cutting staff rework and reputational risk.

NUCLEATION

Laser-Etched

Micro-etching inside the glass creates precise nucleation points that energize carbonation, delivering a steady stream of bubbles for a livelier, longer-lasting serve in sparkling drinks.

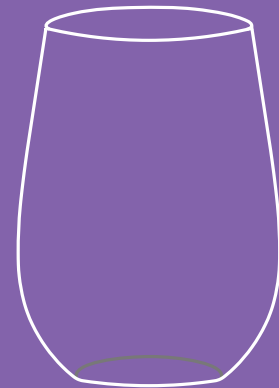

Enhanced Aroma

Continuous bubble release lifts aroma compounds and boosts visual appeal, improving perceived freshness and flavor while ensuring repeatable, presentation across every pour.

COLORED

Organic Color

Naturally inspired hues that give your table a distinct identity, from warm ambers to deep botanicals, matching brand, season or menu mood.

Fade-Resistant

Color formulation built to withstand industrial dishwashing and sunlight in order to maintain the tones of color true service after service.

SALERNO

The Salerno glass, defined by precision. Its conical silhouette and sharp plane transitions create a disciplined, modern profile that stays consistent across every piece. The gently narrowing rim concentrates bouquet and channels aroma to the nose, heightening flavor without overwhelming the palate. On the table, it reads as intentional and exacting, an emblem of elevated service that pairs seamlessly with its stemless counterpart for cohesive programs across dining rooms, tastings, and events.

SALERNO

The same architectural clarity, minus the stem. This conical, sharp-lined bowl brings a confident, uniform character to casual-elegant service, with a tapered mouth that gathers aromas and enriches each sip. Use it alongside the Salerno Stemware to mix formal and relaxed presentations while preserving one design language. One family, two formats, modular, versatile, and visually unified for any menu or occasion.

SALERNO

Fine vertical striations catch and reflect light, creating subtle motion inside the bowl. The increased micro-surface area supports gentle aeration, while the conical body narrows to focus aroma and lift bouquet. Sharp transitions and a poised stem give the piece an architectural stance that reads modern and exacting on the table. Pair with the stemless version to achieve a unified design language across formal service and tasting flights.

MODENA

A low-profile form that brings confident simplicity to casual-elegant service.

Light plays through the vertical striations, while added surface area helps the wine open; the tapered mouth concentrates aroma for a cleaner finish. Conical geometry and crisp edges maintain the collection's architectural character. Mix with the stemmed goblet to vary presentation without breaking visual unity.

İSTANBUL

A quiet dialogue of lines. The tea glass features refined vertical striations that catch light and guide aroma, while the square saucer's horizontal and vertical engraving echoes the **İstanbul** family code for a crisp, architectural set. Together they deliver visual harmony and professional function: a stable footprint, clean presentation, and a design story that links every serve back to the city that inspired it. Formal or casual, the identity stays consistent across the program.

BONN

Two tumblers share a single rim diameter, nest securely to save space, and shift effortlessly between beverage and snack service. For repeatable precision, the design pairs a familiar, nostalgic silhouette with a clean, modern stance. Distinct polygonal bases, each cut with a different number of facets, create a subtle light play as reflections move through the glass, giving every serve its own signature. The result is a compact, versatile duo that balances form and function while keeping operations streamlined.

RAVENNA

A single rim diameter, three heights, built to flex from short serves to tall pours without breaking the visual code. Each piece carries a geometric relief that adds depth, catches light, and lends confident handfeel; the patterns shift subtly across the set to keep the family unified yet distinct. Designed to stack compactly, the trio saves precious shelf space and speeds resets in tight back-of-house footprints. Modern in stance, tactile in use, and versatile across beverages and small plates, this textured glass series offers a refined alternative for everyday service; consistent, space-smart, and ready for hospitality at scale.

Sardinia draws its line from a single, confident curve, a broad coupe that feels architectural, not ornamental. The bowl opens like a small stage, the stem is purposeful, and the rim stays fine for a clean sip. In bright service light, its clarity shows color and foam with intent; nothing distracts, everything frames the drink.

Refined for service, **Sardinia** pairs elegance with discipline: a wide surface that releases aroma, precise headroom for foams and citrus oils, a balanced stem and grounded foot for steady one-hand carries. Capacity is calibrated for consistent specs; the pour line is obvious at a glance. Tempered and suitable for professional dishwashing, it keeps its poise through volume service, making every sour, daisy, and signature coupe look composed from prep to last toast.

Drawn from a single, confident arch, **Archie** turns geometry into purpose. The silhouette is clean and timeless: a lifted bowl; a stem set to the right height for comfort; a grounded foot that reads stable at a glance. Brilliant clarity stages color, texture, and garnish without distraction, glass that frames the drink, not the other way around.

Colmar is a modern tulip drawn with restraint: a lifted bowl that opens at the waist and narrows to a fine, quiet rim. The silhouette feels architectural, light on the eye, balanced in the hand. Crystal-clear walls showcase the wine's hue and natural legs, while the long stem maintains an elegant profile on the table and steady control on the tray.

Built for service, not just show. The tapered chimney concentrates bouquet, while the generous mid-bowl encourages gentle aeration for whites, rosés, and lighter reds. A precise rim delivers a clean first sip; the stem separates hand heat to preserve temperature. The foot is grounded for rush-hour stability, the pour line is obvious for training, and the glass is engineered for repeated dishwashing. Colmar turns consistency into an aesthetic.

LET THE AROMA FLOW

The volume and silhouette of a wine glass directly shape the tasting. Precisely engineered, LAV HORECA bowls give wine room to breathe, amplifying aroma release for a more immersive experience. A refined, tapered rim guides the flow to the palate, revealing subtle notes with accuracy. From bold reds to delicate whites, our balance of form and function ensures aroma and flavor are fully expressed.

A wider bowl captures bouquet and welcomes oxygen—ideal for reds, deepening complexity and rounding flavors.

The rim diameter shapes aroma perception. Narrower rims focus and intensify the bouquet, ideal for whites, delivering a more concentrated, high-definition sensory experience.

Fine, thin glass showcases color and clarity, elevating elegance without adding weight.

Taller stems minimize hand heat transfer—especially suited to whites to help maintain serving temperature.

A broader base improves stability, supporting safer service with reduced tipping risk.

POUR *by* INTENT

ARCHIE

Red Wine: Space to Breathe

Reds show best with surface area and controlled convergence at the rim. **Archie**, **Sardinia**, and **Lyon** feature larger bowls with a softly narrowed mouth, giving tannic wines room to open while channeling complex aromas toward the guest. The wider base stabilizes a confident swirl; the silhouette signals premium service before the first sip.

Page 39

White Wine: Crisp, On Point

Whites reward precision, a slightly narrower rim to focus fruit and mineral, plus a bowl that doesn't overexpose the wine. **Colmar**, **Vienna** and **Paris** are engineered for that task: fine rims for a clean sip point, bowl geometry that highlights citrus and floral lift, and brilliant transparency that keeps the presentation razor-sharp at table and pass.

Rose: Space to Breathe

Rosé thrives on delicate aromatics and a clean finish. Shapes with a gentle taper and fine rim keep the nose focused while protecting freshness. LAV HORECA **Colmar**, **Sardinia** and **Venice** deliver that balance: medium bowls for a light swirl, narrowed mouths to lift strawberry and floral notes, ensuring every pour retains its elegance.

A single arch becomes a signature silhouette. Shaped by the language of arches, Archie turns glass into architecture. Each piece frames the drink quietly bold, timeless in character, and unmistakably professional. From crisp whites to full-bodied reds, from Espresso Martini to a sparkling celebration, Archie gives every classic a modern stage. The collection's refined rim, balanced proportions, and crystal-clear transparency deliver guest-pleasing elegance with operator-ready reliability, built for consistent pours, fast service, and a lasting impression.

MALLORCA

Mediterranean calm.

Mallorca borrows its calm from a shoreline, clean walls, a gentle taper, and a rounded, light-catching base. The form is understated and modern, built around a comfort rim that feels natural in everyday use. It's a relaxed, versatile shape that looks as good at breakfast as it does late at the bar.

Made for pace and consistency. The tapered profile gives a confident grip for tray runs; the weighted base resists tipping at the pass. A durable, rolled rim stands up to polishing and high turnover. Brilliant clarity showcases water, juices, highballs, and zero-proof signatures, while the straight sides pack efficiently in racks for fast cycles and quick redeployments. One glass, many roles, **Mallorca** keeps service smooth.

Budapest translates urban geometry into a confident long-drink silhouette for modern bars. Converging facets recall riverfront architecture, catching light on the backbar and giving a sure, tactile grip in service. The tall profile keeps bubbles lively and layers clear. Balanced weight and a steady footprint support quick turns without fuss. Distinctive enough to be remembered, disciplined enough for daily volume, Budapest turns routine highballs into a signature serve.

BUDAPEST

TOKYO

TOKYO has been honored with both the German Design Award 2023 and the iF Design Award 2023, a testament to its outstanding design and functionality.

Combining a sleek, award-winning form with a snug, push-on lid, Tokyo offers a refined, reusable solution perfect for dry and semi-moist dishes. Its design not only enhances freshness and appearance but also ensures practicality and durability for everyday service. These prestigious awards highlight **TOKYO**'s innovative approach to glassware, showcasing its commitment to quality, sustainability, and modern elegance in the hospitality industry.

Design seamlessly blends aesthetics with practicality, making it the ideal choice for restaurants, bars, and event spaces that prioritize both style and performance. Its ergonomic features and versatile design elevate the guest experience while maintaining operational efficiency.

ISTANBUL has been honored with the iF Design Award 2024, the Good Design Award from The Chicago Athenaeum, and the German Design Award 2025 from the German Design Council; independent endorsements of both design excellence and operational relevance.

Meet the **ISTANBUL Trio**, highball, lowball, and carafe, precision glassware engineered for the pace of modern hospitality. Each piece balances durability with refined form, standing up to back-to-back services while elevating the guest experience. A sleek, stackable profile streamlines storage and speeds setup; crisp clarity and clean lines ensure every pour looks premium on the pass and on the table.

Built for busy shifts. Designed for lasting impressions. The **ISTANBUL Trio** helps you serve faster, store smarter, and showcase every beverage at its best.

ISTANBUL

CAMBRIDGE

CAMBRIDGE has been honored with the German Design Award 2026 from the German Design Council and Good Design Award from The Chicago Athenaeum.

CAMBRIDGE is a thoughtfully designed hot drinks set that blends retro aesthetics with modern touches. Inspired by retro ceramic sets, it offers contemporary functionality while evoking nostalgia. **CAMBRIDGE** brings ease to daily use with ergonomic handles and stackability. Soft, curved forms and smooth edges create a refined retro look, while wide, elegant rounded-square saucers complement the sleek design and add warmth.

Familiar yet contemporary, **CAMBRIDGE** is perfect for those who value comfort and convenience in daily rituals. Whether for quiet mornings or lively gatherings, it brings charm to every moment.

Internationally Awarded. Operationally Ready.

ARCHIE has been honored with the German Design Award 2026 from the German Design Council.

Inspired by the timeless forms of the arches, the **ARCHIE** collection translates one of architecture's enduring elements into glassware. **ARCHIE**, with its bold proportions, repeating arches and harmony of ornament and practicality, reflects the spirit of Art Deco—where architecture and decorative arts merge through a modern reimagining of classical geometry. The collection offers versatile pieces, crafted for durability and scratch resistance to meet hospitality standards while preserving a refined sculptural character.

ARCHIE bridges heritage and modern service culture, ensuring every drink is presented with balance, clarity, and elegance.

LIVERPOOL
Page 75

BERLIN
Page 75

Pilsner: Crisp Line, Fast Finish

A proper Pilsner should look like a column of light-needle fine bubbles racing to a tight, snowy cap. Tall, narrow profiles keep carbonation taut and the finish razor-clean, so every sip lands brisk and dry.

MUNICH, LIVERPOOL, BERLIN. Their slim chimneys preserve effervescence, the straight walls deliver a no-drama pour, and the confident bases hold steady on tray runs. One glance and the guest already knows: cold, crisp, refreshing.

IPA: Aroma First, Color on Stage

Modern IPAs sell on the nose, citrus, pine, tropicals, and on a head that lasts through the conversation. Shapes with a gentle belly and a slightly open rim let hop oils bloom without killing the foam, while giving haze and hue a clear stage.

BERLIN, BREMEN, HELSINKI. Tulip-leaning silhouettes lift aromatics toward the rim; the broader shoulder supports a resilient cap; clarity showcases everything dry-hopping brings to the glass. The scent trail invites the first sip.

Wheat: Cloud, Clove, Citrus

Wheat beers are theater: a soft, towering mousse; a veil of haze; clove and orange zest rising from the glass. They need volume for headroom and curves that guide aroma to the guest without rushing the pour.

ZAGREB, MUNICH, PARIS. Generous bowls and taller walls create space for that signature foam, while rounded profiles spotlight color and texture. The result is a silkier, more controlled sip exactly how wheat styles were meant to be served.

SHAPE OF THE SERVE: COCKTAILS

BUDAPEST

Spirit-Forward: Precision & Poise

A martini or Manhattan should arrive with signature clarity, perfectly chilled, composed, and aromatic. Compact bowls focus the nose, clean rims sharpen the first sip, and the silhouette telegraphs intent before the glass touches the table.

SARDINIA
Page 85

Martini Glass Classics: Texture on Display

Espresso Martinis, Cosmopolitans, and Daiquiris are made to be served “up” in a chilled martini glass; clean, cold, and visually sharp. The wide rim opens espresso-roast and bright citrus notes, while the balanced stem keeps the serve colder for longer and steady through garnish and service.

ARCHIE
Page 83

On the Rocks: Weight & Clarity

Old Fashioneds and spirit-plus-ice signatures win on control—cold without mute, dilution that moves in clean lines, aroma lifted by citrus oils at the rim. Short, wide bowls showcase the cube, keep the garnish in frame, and land with authority on tray and table.

EDINBURGH
Page 80

Long & Spritzed: Refreshment, Engineered

Collins, Mules, and Spritz builds need height for bubbles, volume for ice, and a clear stage for color. Tall columns keep dilution linear; generous goblets turn herbs and citrus into part of the theatre.

The LAV HORECA **Tokyo** line is suited for everyday service. **Tokyo** pairs a clean, award-winning form with a snug, push-on lid for a refined, reusable presentation. It's ideal for dry and semi-moist dishes where freshness and appearance matter; think grains, salads, small plates, and desserts.

The LAV HORECA **Kyoto** line: airtight reliability for secure handling. **Kyoto** is the reliable solution when a tight seal is nonnegotiable. Its gasketed, lock-on lid creates an airtight, leak-proof closure that keeps sauces contained and quality consistent from prep to service. The dual-compartment format let you separate wet from dry, hot from cold, or mains from sides without compromise. Salads with dressings, rice with curry, pasta with sauce: components stay distinct until the moment of service.

Whether you choose **Tokyo** or **Kyoto**, you're making the right choice for your business; durable, reusable glass solutions that elevate presentation and streamline operations.

Color That Performs

LAV HORECA's colored glass family introduces subtle color to service, turning signature serves into focal points without changing how your team works. Tints are rich yet restrained, chosen to elevate liquids rather than hide them. Clarity stays high, so layers, bubbles, and garnish read clean on the table and in photography. The familiar LAV HORECA balance, fine rims, and tray-safe proportions remain intact, giving bartenders and servers the same dependable handling they expect every shift.

Color serves as an expression of character, not classification. Jewel tones add energy and create a lasting visual impression. Pair shades with ingredients, themes, or seasons to create a cohesive look across venues, events, and menus.

The result is a stronger visual identity that supports price perception and keeps guests talking long after the glass is cleared.

Every piece is engineered for the demands of hospitality service. The tint resists fading through repeated professional dishwashing. Surfaces keep their polish and scratch resistance through high turnover. Forms rack efficiently and store neatly to protect inventory and speed redeployments. In short, you gain atmosphere without sacrificing service efficiency or durability.

Select the palette that fits your space and let the serve do the rest. Distinctive, service-ready color that strengthens presentation and keeps operations running smooth.

THE TASTE OF THE DAY

SARDINIA & VIENNA

MORNING RITUALS

Breakfast moves fast. LAV HORECA equips buffets and à la carte lines with stackable juice glasses, fine-rim tea and coffee pieces; complemented by durable, clear bowls and jars that rack tightly and reset quickly. Fully tempered and buffet-ready, they keep stations tidy, service quick, and presentation consistently sharp.

LAZY MORNINGS

Brunch is ceremony, and margin. Pair bubbles with coupes and goblets, set shareable carafes, and spotlight layered parfaits in crystal-clear glass. LAV HORECA delivers fine-rim finesse with service-grade durability, made to photograph beautifully, upsell effortlessly, and invite guests to linger.

TEA & TALK

Ritual, in real service. Tea breaks rarely stay “just tea”; foamy matcha lattes, iced matcha, and citrus-mint infusions land on the same table, with biscotti on the side. LAV HORECA keeps every serve crisp through refills: clear brilliance, a confident grip, and a steady pour; built for the in-between hours, from first chat to last refill.

SLOW SIPS

Designed for after-hours service, stackable rocks and doubles suit cocktails, while clear bowls serve desserts and small bites—pieces that nest neatly, retain their polish, and stand up to late service. Toughened where it counts; inviting where it shows.

CARE & HANDLING GUIDE

Glassware is a long-term investment in daily service. Even fully tempered pieces perform best when handled with care and intention. This guide translates proven service practices into clear daily routines—from preventing thermal and mechanical shock to proper racking, storage, washing, polishing, and the safe retirement of compromised pieces. The result is reduced breakage, faster resets, and a consistently flawless presentation, shift after shift.

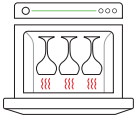

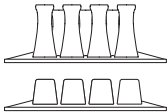

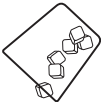

GENERAL HANDLING

Avoiding Thermal Shock Sudden temperature changes can cause glassware to crack or break due to stress:	Temperature Acclimation <i>Allow glassware to reach room temperature before exposing it to extreme heat or cold.</i> Proper Liquid Handling <i>Avoid pouring cold liquids or adding ice into a warm glass. Similarly, do not immerse a warm glass into cold water.</i>	 
Preventing Mechanical Shock Glassware can be damaged by physical impacts:	Gentle Handling <i>Be cautious not to hit glasses against hard surfaces, utensils, or other glassware.</i> Avoid Stacking <i>Do not stack glasses unless they are specifically designed for that purpose.</i>	 
Proper Storage Storing glassware correctly minimizes the risk of damage:	Use Compartmentalized Racks <i>Be cautious not to hit glasses against hard surfaces, utensils, or other glassware.</i> Avoid Overloading <i>Do not overcrowd storage racks or overhead spaces; ensure glasses do not touch each other.</i>	 

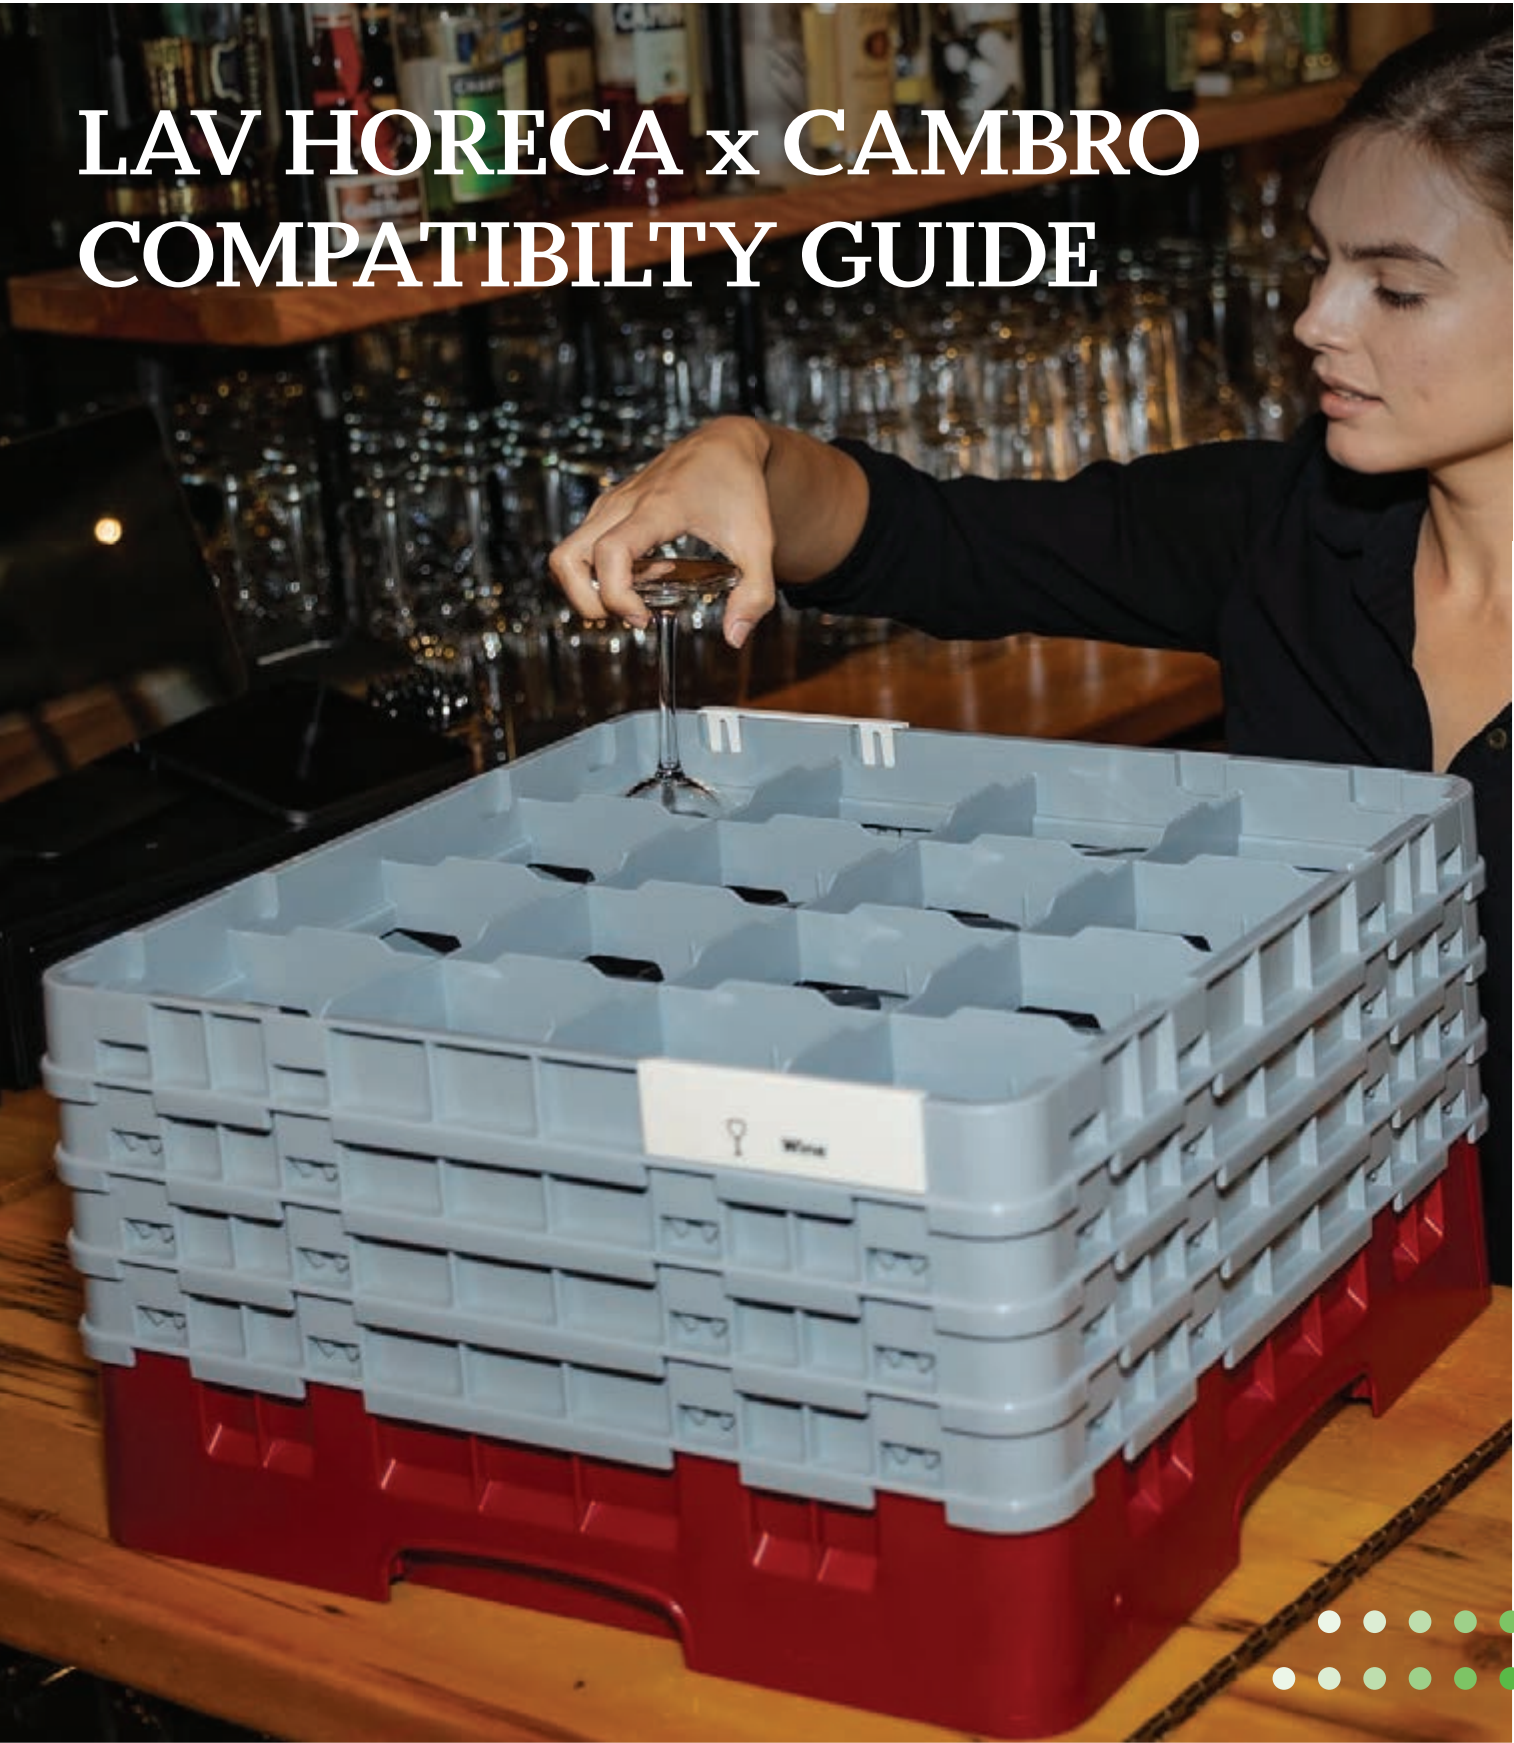

USAGE GUIDELINES

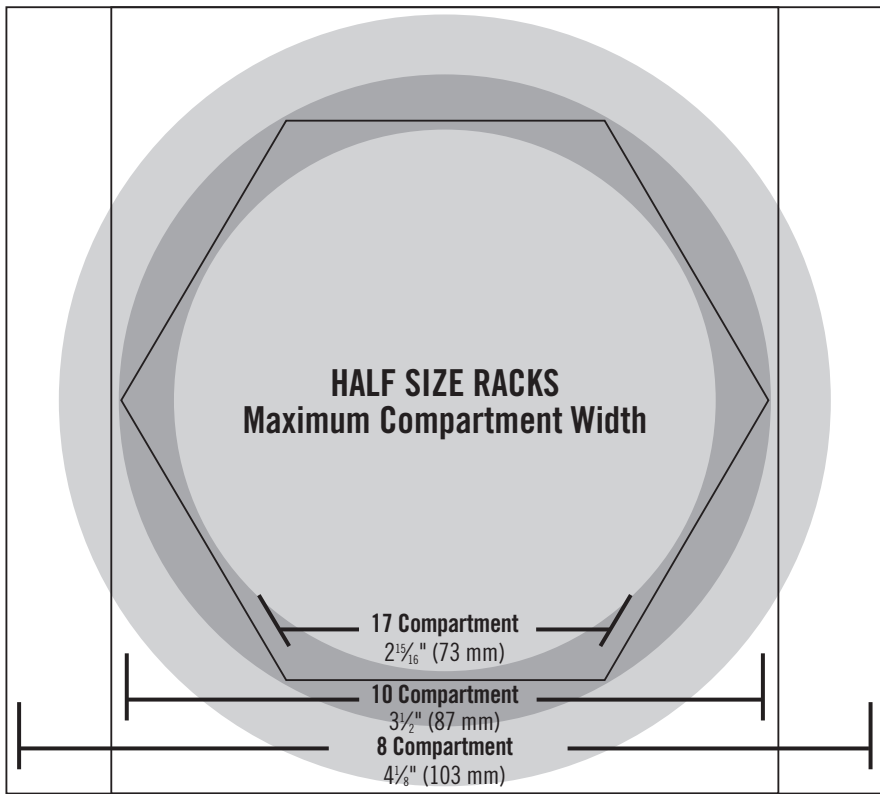

Safe Service Practices Enhance longevity and safety during use:	Proper Carrying Techniques <i>Do not carry multiple glasses together in a way that they might collide.</i> Use Appropriate Tools <i>Always use a plastic scoop for ice instead of the glass itself.</i> Preheat for Hot Beverages <i>Warm glasses with hot water before adding hot drinks to reduce the risk of thermal shock.</i>	  
Dealing with Damaged Glassware Maintain safety and quality:	Immediate Removal <i>Take any chipped, cracked, or scratched glassware out of service right away.</i> Regular Inspections <i>Frequently check glassware for signs of damage to prevent accidents.</i>	 

CLEANING AND DISHWASHING

Dishwasher Best Practices To maintain glassware integrity during cleaning:	Temperature Considerations Do not place warm glasses or those that have held ice directly into the dishwasher.	
	Proper Rack Usage Use appropriate racks to separate different types of glassware and avoid stacking.	
	Controlled Dishwasher Temperatures Set the wash cycle between 140°F and 160°F, and the rinse cycle at 180°F to prevent thermal stress surfaces, utensils, or other glassware.	
	Use the Right Cloth Employ a microfiber or lint-free cloth for polishing.	
	Handle with Care Hold glasses by the stem or base to avoid putting pressure on the bowl, which could cause stress.	
Bus Tray Management Efficient and safe clearing of glassware:	Avoid Overloading Do not pile too many glasses into bus trays	
	Separate Utensils Keep cutlery out of glasses to prevent scratching or breaking.	
	Remove Ice Empty any remaining ice from glasses before sorting and washing.	

By following these guidelines, you will not only extend the life of your LAV HORECA glassware but also ensure a safe and enjoyable experience for your guests. Proper care reduces replacement costs and maintains the high-quality standards that LAV HORECA is known for.

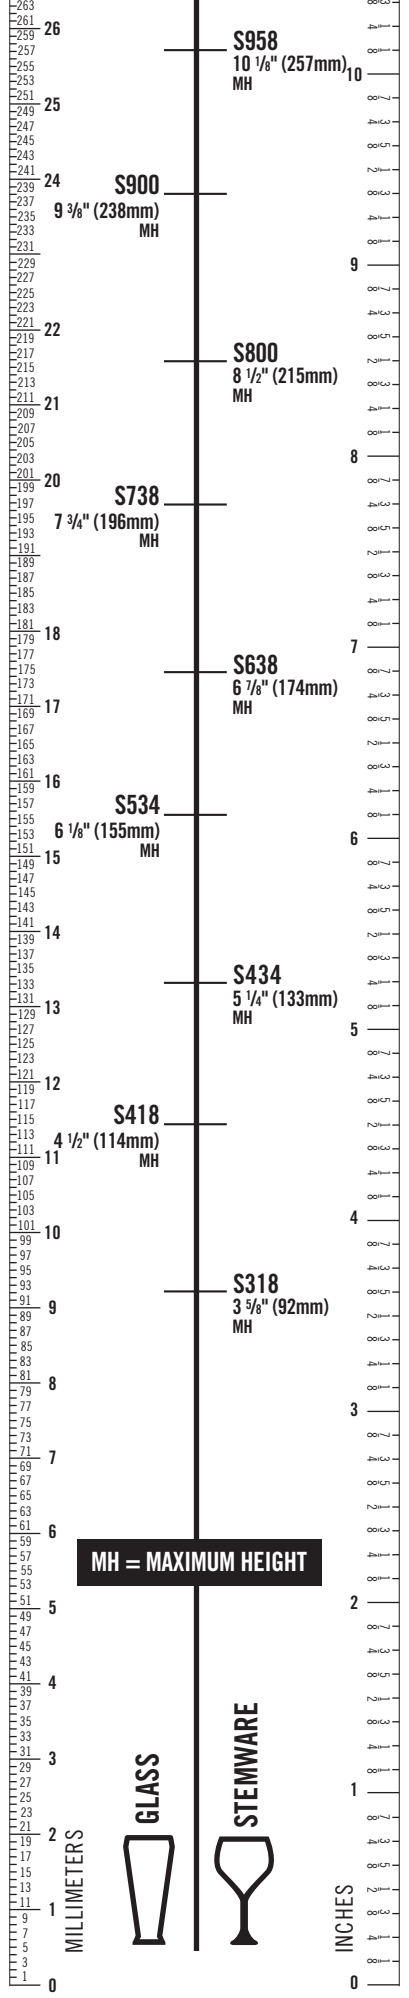

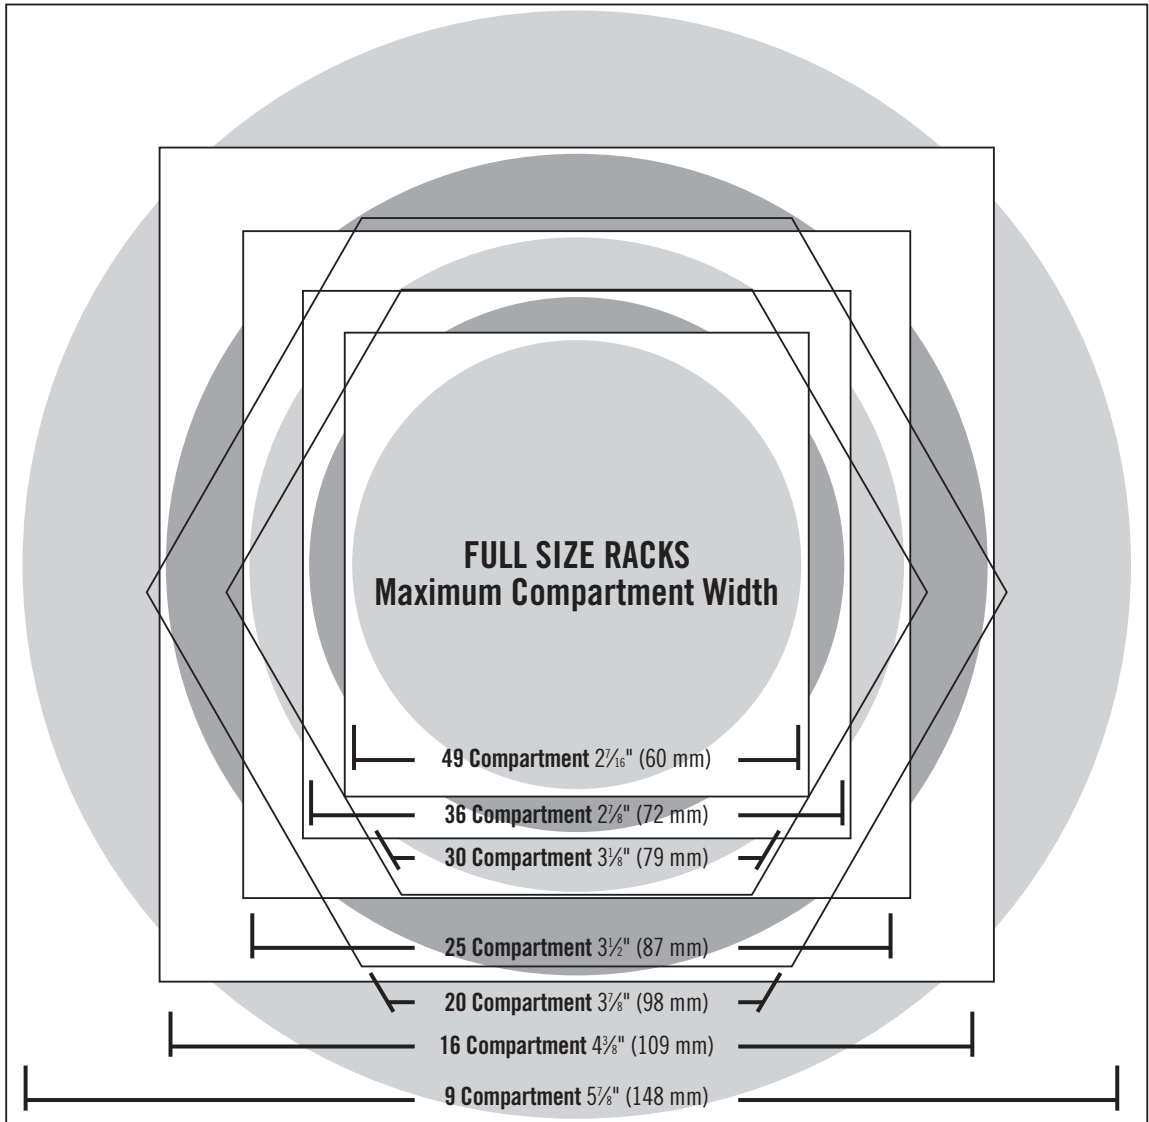

To Determine Compartment Size

- **Half Size Racks:**
Place glass or stemware upside down over circle chart. Look down on the glass. Whatever circle the largest diameter of the glass fits within will determine the number of compartments.
- **Full Size Racks:**
Place glass or stemware upside down over circle chart. Look down on the glass. Whatever circle the largest diameter of the glass fits within will determine the number of compartments.

Use the vertical guide marks at right to determine item height and appropriate rack number.

Seamless Packaging Solutions Tailored for the HORECA Industry

LAV HORECA understands the specific needs of the hospitality business. We can supply full packaging solutions suitable for tiny boutique cafés to large resort businesses. Carefully engineered packaging choices for safe transit and storage facilitate speedy movement in HORECA while also ensuring efficient glassware handling.

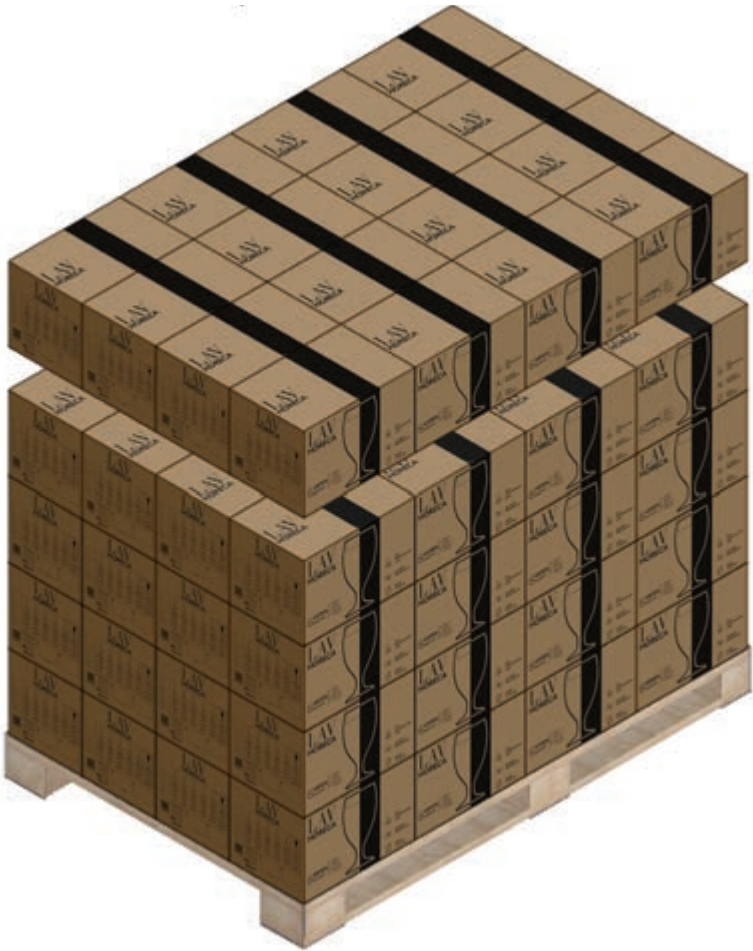

From compact 6-piece and 12-piece packs to larger formats that store more products, LAV HORECA packaging has been carefully designed to fit well on pallets. This ensures that logistics are simple while maintaining the greatest standards of safety and durability for our products, ensuring that your glassware arrives in perfect condition.

HOW TO READ BARCODE INFORMATION?

Item Code	Unique product reference used in orders and inventory.
Pieces per Master Carton	Number of units per master carton.
Inner Box Barcode	Barcode for inner units.
Master Carton Barcode	Barcode for outer carton.
Master Carton Width/Length/Height (mm)	Outer dimensions in millimetres; needed for storage, palletisation and transport planning.
CMB/Carton (m³)	Carton volume. Formula: W × L × H (mm) ÷ 1,000,000,000.
Master Carton Weight (kg)	Gross weight per carton. Use for vehicle tonnage and shelf safety.
Pieces per Europallet	Total pieces on pallet.

NUCLEATION

Laser-Etched

Micro-etching inside the glass creates precise nucleation points that energize carbonation, delivering a steady stream of bubbles for a livelier, longer-lasting serve in sparkling drinks.

Enhanced Aroma

Continuous bubble release lifts aroma compounds and boosts visual appeal, improving perceived freshness and flavor while ensuring repeatable, presentation across every pour.

COLORED

Organic Color

Naturally inspired hues that give your table a distinct identity, from warm ambers to deep botanicals, matching brand, season or menu mood.

Fade-Resistant

Color formulation built to withstand industrial dishwashing and sunlight in order to maintain the tones of color true service after service.

LAV HORECA
